Affordable Home Internet Service
Welcome to a better Residential Internet Service

Amplex uses the latest in fixed-position wireless technology to deliver dependable broadband Internet service to your home. Our service does not require a phone or cable line, saving you money with a secure and reliable connection.

We can reach many locations where cable or DSL are not available or are unreliable. With over 50 access towers throughout Northwest Ohio, Amplex has provided residential and business broadband to thousands of satisfied customers.

- 24-hour technical support
- No hidden charges or fees
- Reliable, fast and affordable high-speed home Internet service
- Local professional service and support

Since 1997 Amplex has provided reliable home Internet service to local families just like yours. Our large service area and multiple access points ensure that you get high speed Internet access 24 hours a day and 7 days a week. Our commitment is to provide you with the Internet speed and reliability you deserve.

We provide wireless home internet service throughout much of Northwestern Ohio including Waterville, Bowling Green, Oak Harbor, Perrysburg, North Baltimore, Genoa, Curtice, Woodville, Gibsonburg, Put In Bay, Fremont, Lindsey, Bloomdale, Custar, Rudolph and many more locations.

If a problem should occur, you can talk to our professional tech support located in Millbury, OH, not put on hold for minutes at a time only to speak with someone who cannot answer your question.

"I have used Amplex service for many years now. I was grateful they were servicing my area as there were no other options for internet where I live. I also love how reachable they are. I actually get a real person when I call and they are always pleasant and knowledgeable. I just wanted to say thank you for your excellent customer service!"
~H.B., Bowling Green

Usage Graphs, Plan caps or limits

Usage Graphs We recently added usage graphs to the customer invoices. We have added the graphs for a couple of reasons:
We want our customers to know how much data they are actually using.
We want you to be able to tell when your usage has changed significantly.
It makes it easier to compare services with other technologies such as WiFi hotspots.
New service plans may have data limits.

It's very...
